Details Information about course to publish

Short description of the course (main aim, relevance, broad content to be covered)	Incorporating the gender perspective in every formative itinerary is essential and it needs to be defined as a strategic goal in VET centers. This course is intended to provide VET professionals with theoretical and practical knowledge and tools to help students incorporate the gender perspectives both in their learning journeys and in their everyday lives. The aim of the course is to help VET practitioners and students deconstruct their imaginaries and dismantle the traditional model of thought, trying to generate new questions and new forms of enhancing equality. For that purpose, the course provides insights on: - The framework: a solid base on which to work - The work plan: how to set goals and actions - The methodology: the questions you need to ask and recommendations At the same time, this course presents a didactic pack to help teachers implement the gender mainstreaming training in the learning spaces.
